EXPERIMENT 3

CO3 LAB-3
Day-2

Program:

```
def minimax(depth, node, maxp):
    if depth == 2:
        return node
    if maxp:
        return max(minimax(depth+1, x, False) for x in node)
    return min(minimax(depth+1, x, True) for x in node)

tree = [[3, 5], [2, 9]]
print("Best value:", minimax(0, tree, True))
```

Output:

```
Best value: 3
```
